Value than Concrete Blocks
- Much Lower Energy Cost
- Lower Homeowners Insurance
- Virtually Maintenance Free
- Guaranteed For 100 Years
- NO EXTRA COST

Wood Frame or Concrete Blocks

(Have none of our features)

About Aeonian Brick Homes, LLC

Aeonian Brick Homes is a South Carolina based LLC brick manufacturing company that has had its bricks tested and certified for home and commercial construction in 34 states by Florida based Davis and Cleaton Engineering.

Our flagship product is an amazing new clay-based, interlocking brick that is waterproof, fireproof, insect-proof, soundproof, mold and mildew-proof, insulates the home, saves energy and best of all, it's the greenest construction material that exists on the market today.

AEONIAN

(ē-ō'nē-ən) to last an eon, or an unspecified long period of time

AEONIAN Brick Homes

We build homes for you and your family that will stand-up to hurricanes, tornados, fire, flood, termites, mold and mildew.

“Buildings, too, are children of Earth and Sun.”
—Frank Lloyd Wright

Frank Lloyd Wright changed the face of residential architecture forever. In 1991 The American Institute of Architects named Frank Lloyd Wright as the greatest American architect of all time.

Aeonian Brick Homes will change the residential construction industry forever.

What if you could really have a home built that would protect itself and your family?

For the last six years we have been involved in research and development of a brick product for the home building industry that would have the following properties:

- Withstand any hurricane or tornado force winds with no damage to the structure.
- Be able to save huge amounts of energy by providing an R-21 heat resistance and an R-45 thermal mass in the walls and roof.
- A home that will not burn from a fire inside or outside of the home
- Your house can not be structurally damaged by a flood
- Will not support the growth of mold and mildew.
- Walls that are so dense it makes the entire home soundproof.
- A home that has no wood or drywall anywhere in the home, therefore no mold or mildew.
- A house that will look exactly like any other home in the neighborhood.
- You can paint, add textures or stucco just like a wood frame home, that requires very little maintenance.
- Paint will never crack, peel, blister or chalk because there is no chemical reaction between the paint and the brick as there is with concrete block.
- COSTS NO MORE than conventional concrete block or frame homes!

WE ARE NOW MANUFACTURING OUR BRICK, AND IT'S AVAILABLE FOR YOU AND YOUR CONTRACTOR TO USE TO BUILD YOUR HOME!

If this is the kind of home that you want to build and live in, contact us for additional information on using AEONIAN bricks to build your home. If you would like for your contractor to receive this information as well, email or call us with his name and contact information.

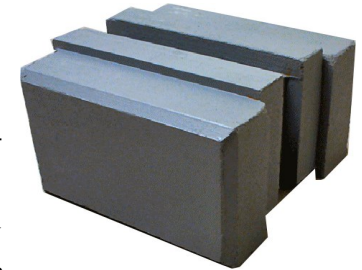

Why It Works

Our interlocking design and shape is what allows us to build a wall that can withstand hurricane force winds.

There is no building product on earth that is “Greener” than our bricks because up to 90% of the brick is made of dirt and clay.

The finished home has no wood, stucco, drywall or added insulation, so toxic and environmentally sensitive building materials are eliminated. And it looks like every other house in the neighborhood.

Using a special adhesive on the bricks is much like welding metal, the weld becomes stronger than the material it is holding together. This fact along with the interlocking shape is why a wall built with our bricks can resist high winds.

We have the only waterproof, interlocking brick in the United States.

Don Blalock, the Founder of AEONIAN Brick Homes has headed the company in its quest to develop, test and certify this new waterproof, interlocking brick.

“No house should ever be on a hill or on anything. It should be of the hill. Belonging to it. Hill and house should live together each the happier for the other.”

—Frank Lloyd Wright
